

## INTRODUCING THE NEW JBLCO AUGER SAMPLER

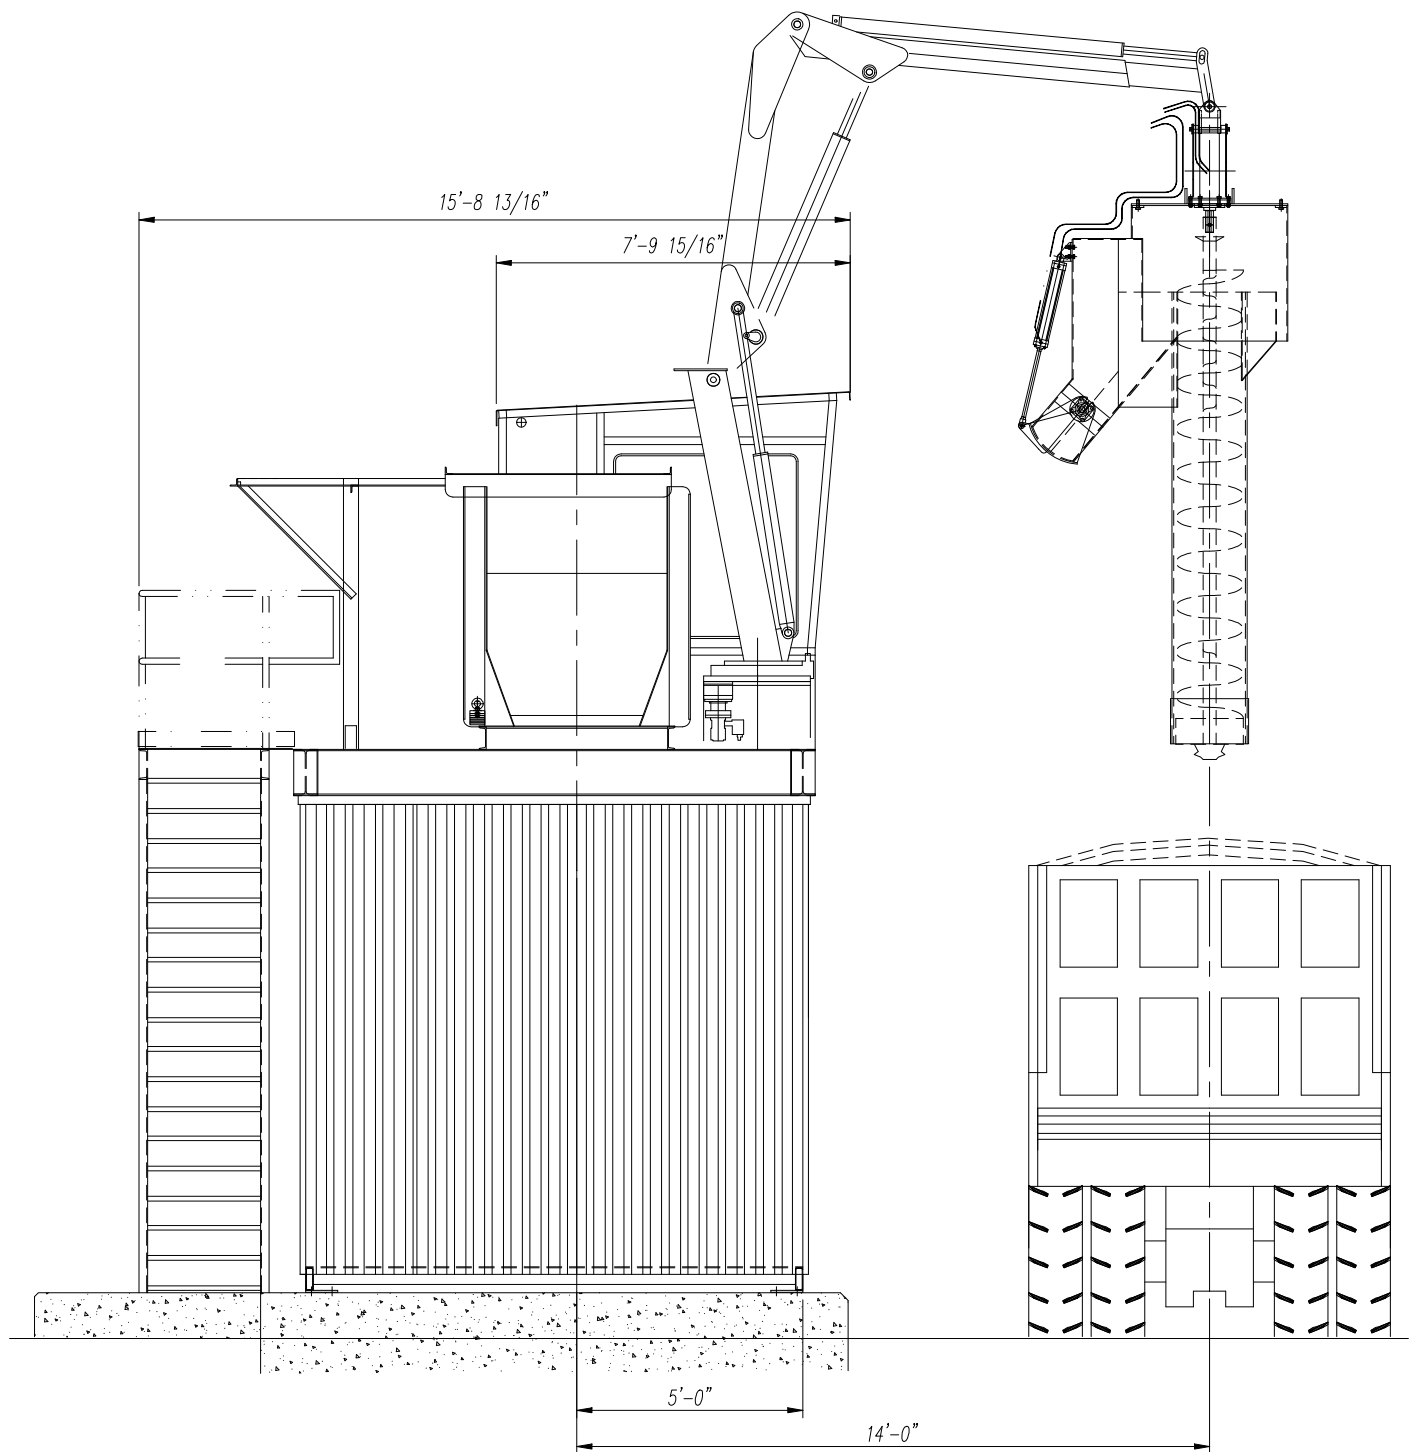

From the same manufacturers who brought you the AutoSampler™, JBLCo now offers the same excellent quality in a truck auger. With nearly 25 years of automated sampling experience, JBLCo has incorporated this knowledge to bring its customers a state-of-the-art truck auger system.

The auger serves as the primary sampler with the remainder of the system operating as any other two or three stage system would operate.

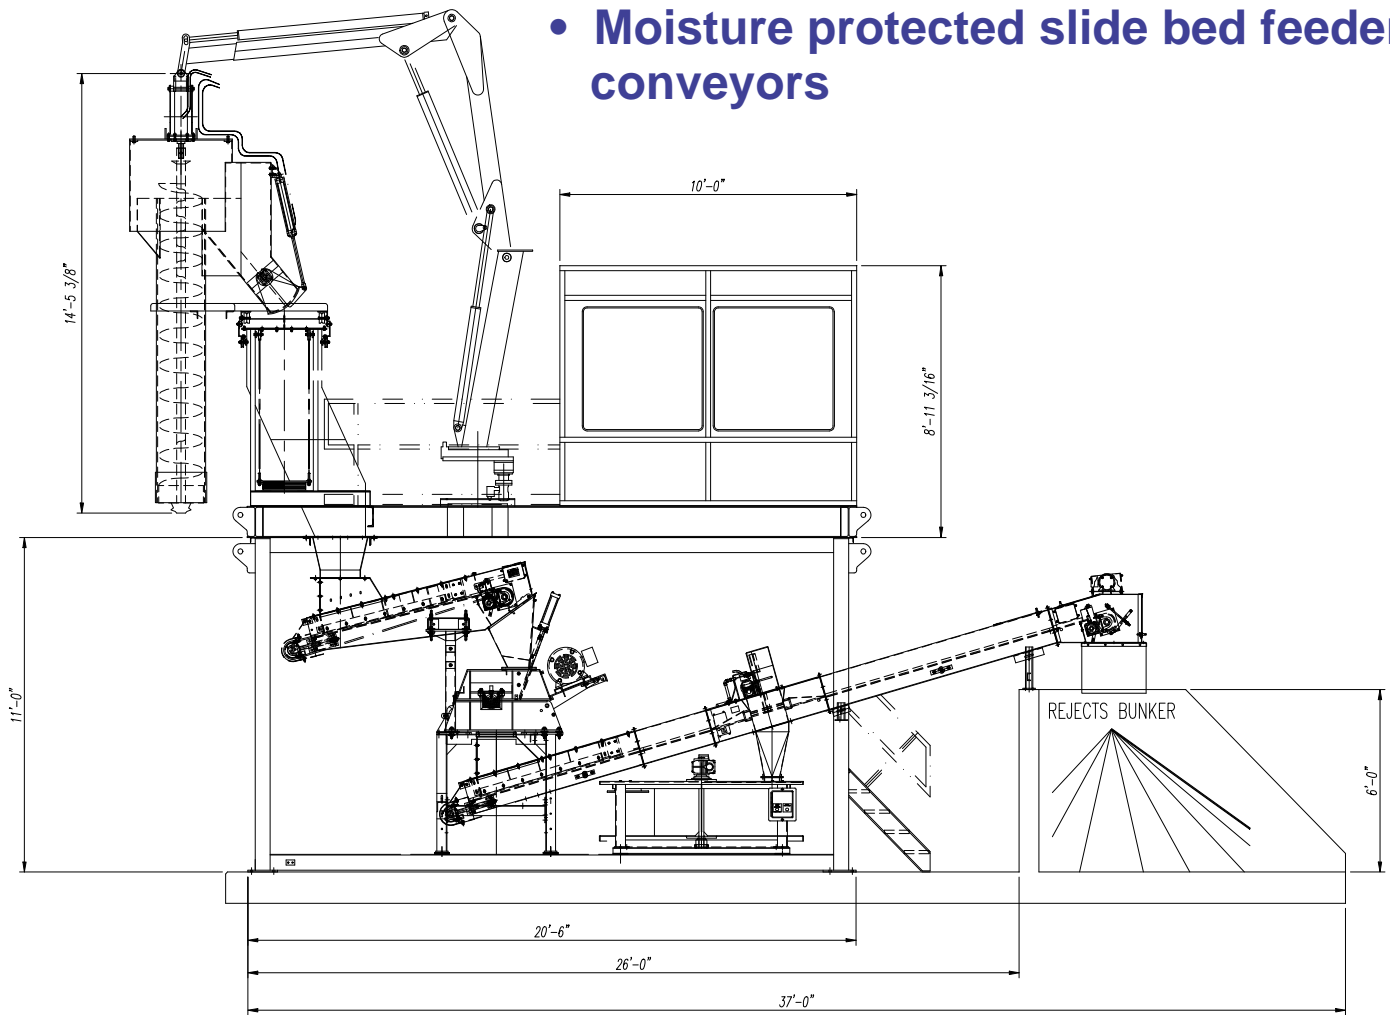

# JBLCo

## Auger Sampling Systems

The JBLCo Auger sampler offers the ruggedness of a permanent unit with the convenience of being portable.

The JBLCo Auger Sampler is shipped as two separate modules that allow the units to be bolted together at the job site.

Installation in most cases can be achieved in two days on the customer's previous poured concrete pad.

JBLCo offers various layouts to suit the customer's needs.
